

# DISTRIBUTION OF PHARMACEUTICAL SAMPLES

We store and distribute your pharmaceutical samples to physicians, dentists, veterinarians, consultants, district nurses and other professional groups. You can feel secure in the knowledge that your products reach ordering parties safely and efficiently in accordance with current regulations.

## WHY CHOOSE THIS SERVICE

Tamro offers an extensive service for storing and distributing pharmaceutical samples. We manage all handling of the samples, including checking the ordering party in an external registry, preparing customer lists, reporting, inventory accounting and distribution of information material. Tamro will ensure that all of this is done properly.

## DESCRIPTION OF SERVICE

When you want Tamro to distribute a pharmaceutical sample to a selected ordering party, such as a person in charge of pharmaceuticals at a community pharmacy, you place a written order to us by e-mail, fax, requisition or a similar method. We will perform an authorisation check through an external registry, which is continuously updated. The pharmaceutical sample is dispatched with a special label reading "Free pharmaceutical sample, not for resale".

Tamro checks the following before issuing pharmaceutical samples:

- The ordering party is authorised to prescribe the pharmaceutical
- The delivery of each sample must be confirmed in writing, dated and signed by the ordering party
- Only a limited number of samples are received by each ordering party
- No sample size may exceed the size of the smallest package available on the market
- Each sample must be accompanied by a product description summarising its features
