

HOME DELIVERY

Internet trade is growing and more and more people want their goods delivered direct to their homes or workplaces. In the future, it is expected that the provision of medical support and health care in the home environment will also increase. Our Home Delivery Service provides effective and safe delivery of medicines and consumer goods to patients and other customer groups.

WHY CHOOSE THIS SERVICE?

There may be several reasons why people don't want to collect medicines or buy consumer goods at a retail pharmacy. Some have mobility problems and feel that the trip to the pharmacy is too strenuous. Others may live a significant distance from a pharmacy, for example when they are at their summer residence, while others may simply think that home delivery saves time and makes life easier.

With Home Delivery from Tamro you can help meet the needs of customers who want medicines and consumer goods delivered directly to a specified address, or the closest pick-up point. Also the Home Delivery Service can help County Councils where certain levels of care are provided to people in their home environment.

DESCRIPTION OF THE SERVICE

The backbone of Tamro is our flow of goods to pharmacies all over the country. Within our distribution centre, we already carry a high percentage of prescription and non-prescription medicines, as well as consumer goods.

Based on this distribution capability, we have created a special network for goods that can be sent directly to the homes of patients and other customer groups. You get the best of both worlds: a professional service that is based on a wide range of products,

and a streamlined distribution flow adapted to meet the needs of home delivery.
