

# BATCH RELEASE CERTIFICATE

New regulations require all pharmaceuticals to be released and approved for sale within the EU. We can help you administer and upload your certificates in our internal portal. This ensures a smooth flow of incoming deliveries for Tamro and allows us to monitor whether a certificate is missing ahead of an incoming delivery and inform you of this in advance.

## WHY CHOOSE THIS SERVICE?

Information on batch release certificates is required to ensure smooth delivery inflows and must be uploaded to avoid unnecessary stoppages and fees in our goods receiving process. This service makes it easy for you to inform Tamro in advance about your batch release certificates and to transfer responsibility to Tamro for monitoring if any certificate is missing.

## DESCRIPTION OF SERVICE

You provide the team at Tamro with information about your batch release certificate. We will monitor the current incoming deliveries of your company's goods to Tamro and, at your request, upload the current certificates to our web application.

An approved certificate must include the name of the good, its strength, its formulation, batch number and a text documenting that the good has been released and approved for sale within the EU. You are responsible for ensuring that all of the information on the certificate is complete and correct when sending it to Tamro.

Unless we have received some form of confirmation that the good has been released and approved for sale within the EU, we will stop it in our goods receiving area and contact you. Once we have received an approved certificate, we will complete the delivery pursuant to the current procedures.
