

DELIVERY NOTIFICATIONS FOR INCOMING GOODS

The quantity of incoming goods to Tamro has increased heavily in recent years. Accordingly, we now require our clients to notify us of their deliveries to Tamro. This enables us to make efficiency enhancements to and improve the structure of our goods receiving practices, and to maintain a high level of quality with secure incoming deliveries and a higher service level as a result. Companies that are unable to administer their notifications can use this service.

WHY CHOOSE THIS SERVICE?

Delivery notifications for incoming goods make it easy for you who don't have the resources to administer these notifications on your own to inform Tamro that your deliveries are arriving.

DESCRIPTION OF SERVICE

You provide Tamro with the notification data no later than 48 hours prior to delivery. The data is entered into a template which will be provided for you. We will enter your data into our system and when all of the data has been entered, the notification of delivery is deemed completed.

We need the following information from you:

- Nordic article number, or the supplier's article number, for the goods that are expected to be delivered to Tamro.
- The batch number of the goods concerned
- Expiry date of the goods concerned as per the YYYY-MM-DD standard
- Number of packages

LEARN MORE For questions related to delivery notifications for incoming goods, you are welcome to contact your regular contact person at Tamro at +46 31-767 75 00.
