

CLINICAL TRIALS

Clinical trials require controlled flows throughout the whole chain. We at Tamro are experts at handling clinical pharmaceuticals and medical devices as well as all the logistics surrounding clinical studies. We design a solution to suit your company's needs. Our international presence also allows us to help you both send and procure medicines in Europe.

WHY CHOOSE THIS SERVICE?

We deliver your clinical materials directly to you without involving middlemen. One agreement is enough. We offer direct distribution to clinics and have agreements with several of Sweden's county councils. You always get a customised solution to meet your needs and wishes.

DESCRIPTION OF THE SERVICE

EU directives and special regulations govern the management of clinical trials. Tamro has its own unit for clinical trials and we comply with all legal requirements within GMP (Good Manufacturing Practice), GCP (Good Clinical Practice) and GDP (Good Distribution Practice). With Tamro as your partner, your company is supported throughout the logistics chain allowing you more time to spend on research.

We offer the following services within clinical trials:

- Warehousing
- Order handling
- Repackaging/Additional marking
- Help acquiring supplementary products
- Distribution within Europe
- Transport follow-up
- Pharmaceutical control
- Reports and statistics
- Handling of returns
- Destruction
- Validated transport packaging with temperature control
