

# TAMRO FILE TRANSFERS (TFT)

For anyone with their own large and effective business information system, home is probably best. Why process business information in external systems – if it can be sent to your system in the form of files?

## MAYBE YOU DON'T EVEN NEED OUR SYSTEM AT ALL

Using TFT you can access business information in file format, enabling the information to be scanned into your system and processed. These files can include anything from stock balances to register statements in the form of article and customer lists.

### System integration

Automatic file transfer between Tamro and your company keeps you up to date with the current stock situation at Tamro – in your system. We handle the most frequently used systems, such as Scala, Movex and SAP/R3. If you run a less common system in your company, please let us know and we'll try to find a possible file transfer solution for you.

### Daily or monthly

Files are transferred in accordance with your needs and wishes. Choose from daily, weekly or monthly transfers. The files can also be delivered in a specially adapted format, which you specify, or in standard format, such as EDIFACT. The transfer method can be anything from e-mail and FTP to your own individual requirement.

### Advice and support

Tamro participates actively in development projects run by its clients, particularly when it comes to the implementation of automated business information solutions. Please contact us for more information.
