

TAMRO WEB DIRECT (TWD)

Have you ever needed fast, up-to-date information on stock balances? Do you want to be sure that an emergency delivery has arrived at your central warehouse at Tamro? Do you want to check which pharmacies are currently having problems with back orders for our products? Would you like to give pharmacies swift information on delivery changes? Or, when you contact them, do you want to access the same information they have in their version of TWD?

LIKE HAVING YOUR WAREHOUSE AT HOME

Tamro Web Direct is the market's fastest application for information on stock balances and back orders. As soon as you log on using your user ID and password, you have immediate access to information on incoming deliveries that day and the delivery information given by Tamro to its customers.

Information on changes

If you receive a message from the factory informing you of a change in delivery, you can enter it immediately into TWD, so that pharmacies are informed of the change at the earliest opportunity. Should a pharmacy call you with a query regarding information in its version of TWD, you have access to the same information. You can easily check whether the product is available at the Tamro distribution centre and inform the pharmacy immediately.

Complete stock control

TWD allows you to check your stocks as easily as if you were in the warehouse. In combination with Tamro's other information services, TWD gives you a complete picture of your stock situation and sales, thereby enabling you to focus on the things that are important to you.
